

How to get some HRT without yo local

gov getting in the ways choomba

Sup chooms, so the news has hit that the local Texas gov is trying to pass a law banning all HRT, all transitional surgeries, and for some fuckin reason vasectomies. We talking a straight up trans genocide and a straight up baby-making nightmare. So, the question of today is WHAAAAT THE FUUUUACK are we gonna do chooms? Well, let's start out with HRT because I lowkey care about that more. Not all HRT is a controlled substance, it's more difficult to get testosterone then estrogen, but ain't impossible my creeps. The best place to go to get all the info you need is the DIY HRT Directory. This site has got all the lil buttons and thing-a-ma-jigs to get the job done. It has all the info a sister or brother or creature needs to survive in this rough climate choom. What you'll need for extra safety though is either a rechargeable paycard, a PayPal, or some bitcoin to purchase yo shit. It keeps you extra safe, also use a VPN of course, that'll help a lot for some extra coverage. Make sure to get blood tests every 3 months. Remember, nothing about DIY HRT is illegal, and it never will be. And even IF it was, the DIY Directory is nothing but an informational site, one with special little links and special little parts. Don't let the government fascists and liberal gonks try to convince you otherwise. Now, to level with you cis bros out there, I'm not sure what to do about a potential ban on vasectomies, but what I can do is just suggest to do a bit of searching into medicines, back alley doctors, and more.
